"Radio Hams" from Milwaukee join in national deployment Public Demo of Emergency Communications June 27 – 28

Milwaukee, WI 22 Jun 2009 – Local "hams" will join with thousands of Amateur Radio operators who will be showing off their emergency capabilities this weekend. Over the past year, the news has been full of reports of ham radio operators providing critical communications during unexpected emergencies in towns across America including the Floods in Jefferson County last summer, the California wildfires, winter storms, tornadoes and other events worldwide.

During Hurricane Katrina, Amateur Radio – often called "Ham Radio" - was often the ONLY way people could communicate, and hundreds of volunteer "hams" traveled south to save lives and property.

When trouble is brewing, Amateur Radio's people are often the first to provide rescuers with critical information and communications. On the weekend of June 27 - 28, the public will have a chance to meet and talk with Milwaukee's ham radio operators and see for themselves what the Amateur Radio Service is about. Showing the newest digital and satellite capabilities, voice communications and even historical Morse code, hams from across the USA will be holding public demonstrations of emergency communications abilities.

This annual event, called "Field Day" is the climax of the week long "Amateur Radio Week" sponsored by the ARRL, the national association for Amateur Radio. Using only emergency power supplies, ham operators will construct emergency stations in parks, shopping malls, schools and backyards around the country. Their slogan, "When All Else Fails, Ham Radio Works" is more than just words to the hams as they prove they can send messages in many forms without the use of phone systems, internet or any other infrastructure that can be compromised in a crisis. More than 30,000 amateur radio operators across the country participated in last year's event.

"We hope that people will come and see for themselves, this is not your grandfather's radio anymore," said Allen Pitts, W1AGP, of the ARRL. "The communications that ham

radio people can quickly create have saved many lives when other systems failed or were overloaded. And besides that – it's fun!"

In the Milwaukee area, the Milwaukee Radio Amateurs' Club (MRAC) will be demonstrating Amateur Radio at the Old Cedarburg Train Depot located on the grounds of the Ozaukee County Historical Society's Pioneer Village on June 27th and 28th. Setup starts at 8 AM on Saturday, operating begins at 1 PM and runs though 1 PM on Sunday. There is no charge to visit the MRAC Field Day operation within the train depot. The remainder of the Pioneer Village grounds are subject to an entry fee. MRAC invites the public to come and see ham radio's new capabilities and learn how to get their own FCC radio license before the next disaster strikes.

MRAC is one of the oldest continuously operating radio groups in the United States. Chartered with the ARRL in 1917 MRAC was one of the few groups that continued meeting though the ban on amateur radio during WWII. MRAC was involved in the first Field Day and has participated in Field Day since.

There are over 650,000 Amateur Radio licensees in the US, and more than 2.5 million around the world.

Through the ARRL's Amateur Radio Emergency Services program, ham volunteers provide emergency communications for thousands of state and local emergency response agencies, all for free.

To learn more about Amateur Radio, go to www.emergency-radio.org. The public is most cordially invited to come, meet and talk with the hams. See what **modern** Amateur Radio can do. They can even help you get on the air!
